Kerr Remodeling
5542 Roundhead Road
Deshler, OH 43516

Dear Kerr,

I have a problem that I am hoping you can assist me with. I own a home with two bedrooms, but there are five of us living here, with one more on the way. We decided to turn the laundry room into a bedroom and move the washer and dryer into the basement. It will be less convenient for doing the laundry, but that's woman's work so I'm not concerned about that. I certainly don't want to build a bedroom in the basement, because that's where I go to get away from these damn screaming kids when I'm at my wits end.

My wife insists upon having natural sunlight in all of the bedrooms (including any old rooms that we turn into bedrooms). She says that it helps keep the children balanced and in good spirits. I think she is full of crap. But if I don't give in to her demands, she won't give in to mine, if you know what I mean.

My problem is that the utility room is surrounded on all four sides with other rooms. I can't seem to find any way to put in a window to natural sunlight in order to make this an acceptable bed room in my wife's mind. I need your help to get the wench off of my back and onto hers.

I've attached a sketch drawing of our house layout for you to look at. You folks are the experts in remodeling. Is there any way to get natural sunlight into the utility room that has no exterior walls? A skylight won't work either. The main attic storage is above our utility room and we have too much baby junk in storage up there that the wife insists on keeping. There really is no way to put in any skylight without losing the attic space. Please help me so that I can get on with, and down to, business.

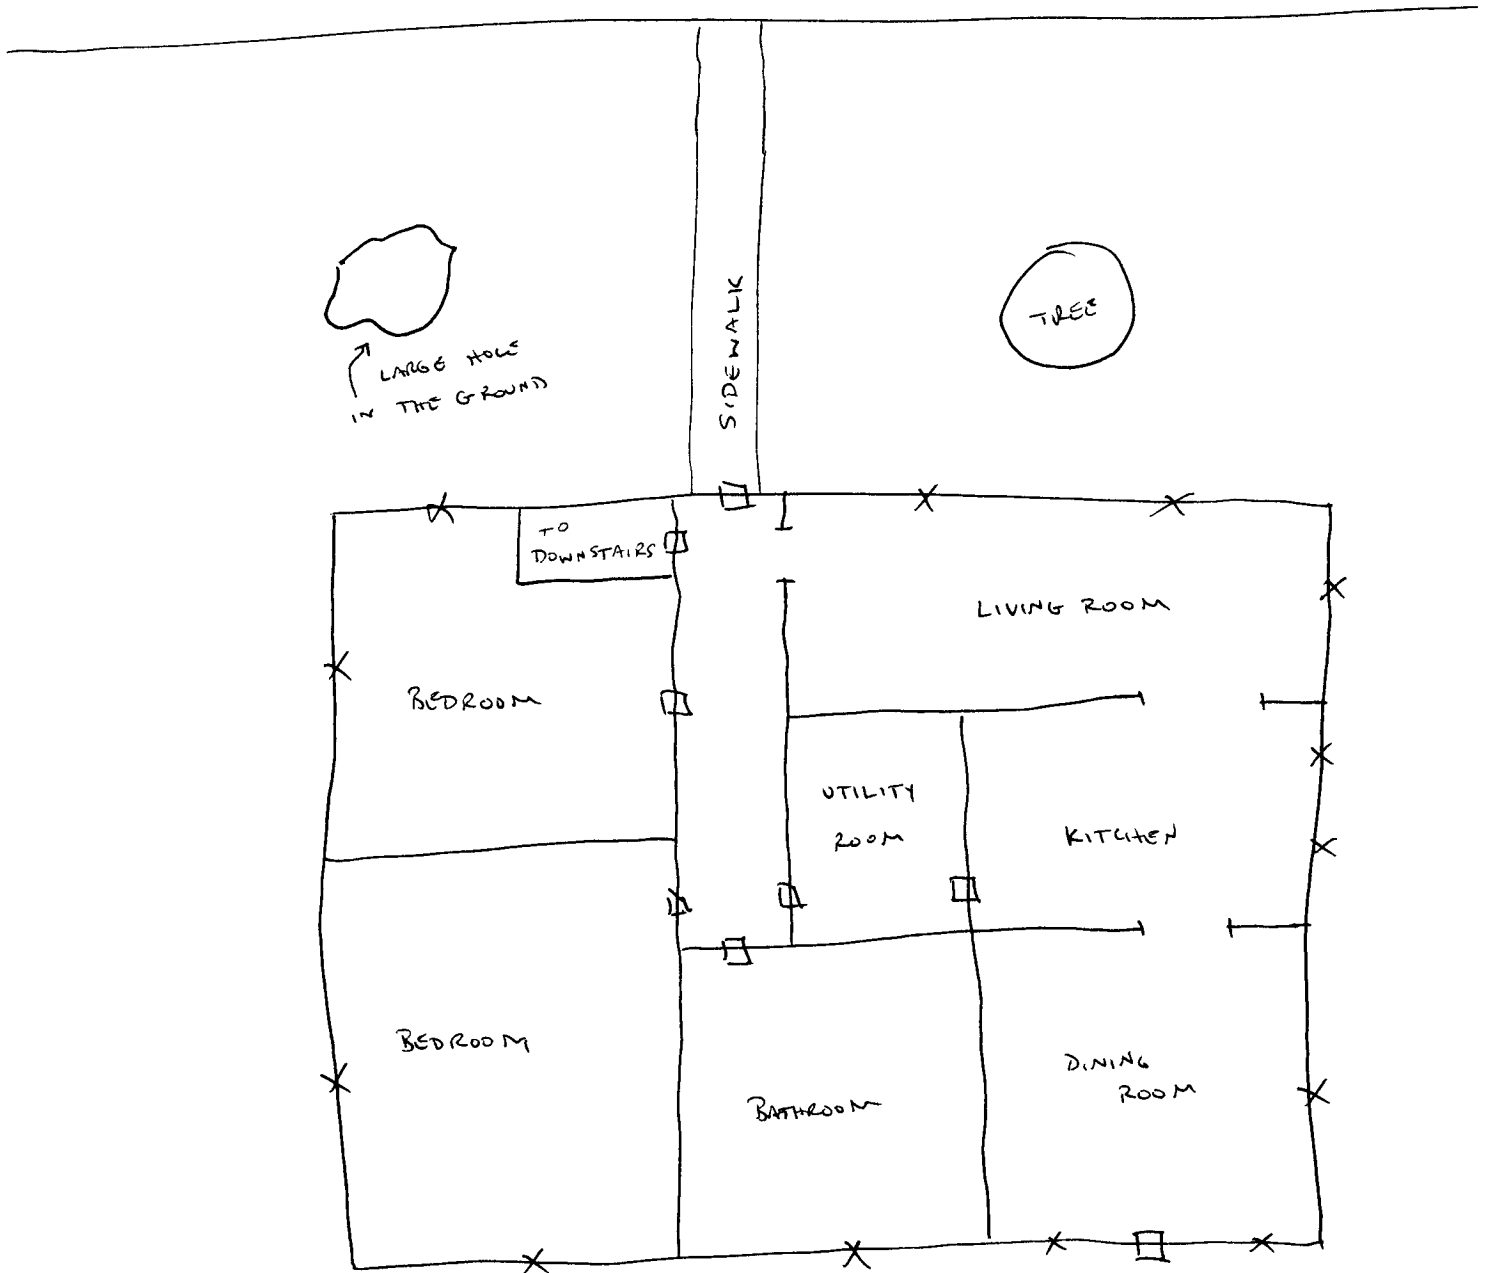

Sincerely,

Rusty Lucas

p.s. I like ball caps and I can't think of a better thing to wear when drinking beer with the guys than a baseball cap with a home remodeling company on the front. That's real man's work! If you send a free Kerr Remodeling ball cap, I'll talk up your business with my buds and our suds.
